Calculations Performed

- Deduction rate = proposed installment / net income = 5,800 / 29,500 = 19.7% (cap 20% → PASS).
- Period check: remaining 132 months vs original approved 300 months → within limit (PASS).
- Arrears coverage: AED 36,000 across 8 unpaid installments (252 days past due).
- Obligation-to-income ratio = total obligations / income = 8,000 / 29,500 = 27.1% (within range).

Explainability statement

This audit trail is generated for transparency and assurance. Every decision is traceable to a rule, a data source and a calculation.
