Calculations Performed

- Deduction rate = proposed installment / net income = 4,000 / 24,000 = 16.7% (cap 20% → PASS).
- Period check: remaining 150 months vs original approved 300 months → within limit (PASS).
- Arrears coverage: AED 28,000 across 7 unpaid installments (221 days past due).
- Obligation-to-income ratio = total obligations / income = 10,500 / 24,000 = 43.8% (within range).

Explainability statement

This audit trail is generated for transparency and assurance. Every decision is traceable to a rule, a data source and a calculation.
