Calculations Performed

- Deduction rate = proposed installment / net income = 4,200 / 27,000 = 15.6% (cap 20% → PASS).
- Period check: remaining 160 months vs original approved 300 months → within limit (PASS).
- Arrears coverage: AED 42,000 across 10 unpaid installments (313 days past due).
- Obligation-to-income ratio = total obligations / income = 19,500 / 27,000 = 65.0% (> 60% threshold).

Explainability statement

This audit trail is generated for transparency and assurance. Every decision is traceable to a rule, a data source and a calculation.
